

The year is off to a fast start with hot new products like Mimaki's new TXF printers for DTF (direct-to-film) apparel printing! So much so, that in this month's newsletter, we have included our new DTF video, our Fiery Digital Factory "DTF" RIP Software article, and the schedule for our upcoming Webinar on RIP Software for DTF. AND – make sure to check out **Mimaki's NEW LOWER PRICING on UV Flatbeds** as well as some very special deals from ITNH!

Also this month, use our link below to get your ISA Orlando show badge and check out our customer success story featuring American Image!

Digital Factory 11 DTF RIP

Mimaki includes a free copy of Rasterlink Pro RIP with every printer. Rasterlink Pro does a fine job. It's fairly easy to use and produces some very nice prints. However, an alternative worth some investigation is the Fiery **Digital Factory 11 RIP**. This RIP option boasts some cool features that can improve color, and quality and possibly save money on ink! Additionally, some users prefer the graphic interface. Learn more by clicking the image below and please join in on our next webinar.

ITNH DTF Instructional Video

Take a minute to look at the very quick and easy instructional video ITNH has made available on youtube. This video is a basic overview of how the **Direct to Film (DTF)** process works.

Customer Testimonial

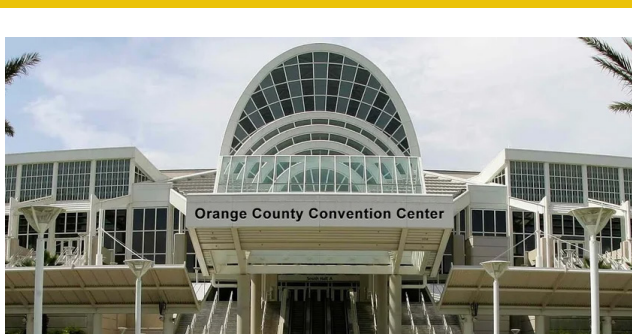

American Image, a producer of signs, display graphics, and award products located in Bergenfield, New Jersey, has acquired the EFI™ Pro 30f wide-format LED Flatbed printer. Prior to acquiring the Pro 30f Flatbed, the American Image production printing fleet consisted of 11 wide-format printers, including eight small flatbeds. Adding the Pro 30f printer to the mix increased the company's production capacity by 30%. In fact, they liked it so much, they just got ANOTHER Pro 30f flatbed!
